Co-op Power Supply Network Benefits Consumers

Russ Hurlbert

You may have heard that Dakota Energy Cooperative, headquartered in Huron serving Beadle, Hand and Hyde counties, is attempting to break its contract with our wholesale power provider, East River Electric Power Cooperative. I, along with our board of directors, want to provide details on this issue and discuss our stance on the matter, including its impact on you, our member-owners.

Codington-Clark Electric along with Dakota Energy and 22 other distribution electric co-ops and one municipal electric system in eastern South Dakota and western Minnesota receive our power supply from East River Electric. Our family of distribution co-ops created East River about 70 years ago when we all came together to sign long-term contracts. Rural residents in our region couldn't get electric service, so they formed our cooperative. Since our co-ops couldn't get a fair deal from the for-profit power companies of the time, they formed East River. These contracts have been continually updated over the years to ensure our cooperative network can access capital to sustain operations and build infrastructure. The decision to sign this contract was a promise between neighbors and cooperatives to work together in the best interest of all consumers. All East River's members freely signed our current power contract in April 2015. On Nov. 6, 2020, Dakota Energy filed a legal complaint against East River to break the contract and withdraw from their membership in the cooperative. Dakota Energy requested an exit fee in their effort to break its power contract.

Dakota Energy intends to seek their wholesale power supply from a for-profit, Denver-based company called Guzman Energy, a power broker, with no infrastructure or investment in South Dakota or Minnesota. Guzman has made attempts in other states to lure cooperatives away from their local wholesale power supply cooperatives. Now, unfortunately, Guzman is attempting to make profits off of South Dakota's co-op member-owners.

We stand with East River Electric because, collectively, we are East River Electric. We Formed East River. We Own East River. We Are East River. We want to keep our co-op family whole. We understand that every cooperative faces unique challenges, but that's why for 70 years we have all worked together to solve problems and face the future together. Our proven long-term strategy is better than a short-term gamble with an entity like Guzman.

East River's board has representatives from the member systems they serve. Dave Warkenthien currently serves as Codington-Clark Electric's representative on East River's board. Through our representation on the board, we help set our power supplier's direction and collectively agree on our wholesale rates. That's the power of our co-op network – we have a voice. Our cooperative network is not beholden to investors. No one's profits come before our members. We are here for you and East River is here for you.

In 2021, East River forecasts a third consecutive year with flat rates. Our co-op network is cost-based, which means that any excess funds are returned to the member. In the past 10 years East River has returned almost \$27.5 million to their member systems. A for-profit company doesn't return its profits to its customers. That's just one of the values of being a part of the cooperative network.

Again, we stand with East River to keep our cooperatives local, reliable, and out of the hands of for-profit investors. As always, feel free to reach out with any questions or concerns. Thank you for the trust that you have in our co-op family to provide you with safe, affordable and reliable power.

Capital Credits Retired

At the November board meeting action was taken to make a general retirement of capital credits. The board chose to retire the entire 1998 balance, \$242,357 and the entire 1999 balance, \$267,965 for a total of \$510,322. This is the largest retirement of capital credits the cooperative has ever made.

The retirement checks will be mailed to members in December that purchased electricity from the cooperative during 1998 and 1999. The retirement

amount for each member is based on the number of kilowatt-hours purchased per member during this timeframe.

Through October 31, 2020, Codington-Clark's unretired capital credit balance from 1998 through 2019 was \$15,755,861. So, where does this amount come from? It is the total of all margins for each year from 1998 through 2019. Codington-Clark

electric is a non-profit electric cooperative. Even though we operate as a non-profit we still need to make sure the business takes in enough revenue each year to pay all expenses along with a slight margin. It would be pretty hard for our lenders, RUS, CFC and CoBank to lend us money if we didn't show a margin.

We don't use the word profit because any excess earnings are returned to the people that caused the excess earnings at a later point in time.

After this retirement there will be 20 years of margins left on the books that will eventually need to be returned to the Co-op members. By sticking with the philosophy of staying roughly 20 years out in capital credit retirements, each member past, present and future is treated fairly. If the co-op were to retire the entire \$15,755,861 today, all future members would be forced to pay higher electric rates as the \$15,755,861 would have to be borrowed.

Electric cooperatives are unique in the way excess earnings or margins are handled. With investor owned utility's profits are returned to shareholders. With municipal owned electric systems excess earnings are usually transferred to the city. With an electric cooperative all margins are returned to you the member-owner.

How Do Capital Credits Work?

Because electric co-ops operate at cost, any excess revenues, called margins, are returned to members in the form of capital credits.

5
Your co-op notifies you of how and when you'll receive your capital credits retirements.

1
Your co-op tracks how much electricity you buy and how much money you pay for it throughout the year.

Electric co-ops have retired
\$9.5 billion
to members since 1988.

At the end of the year, your co-op completes financial matters and determines whether there is excess revenues, called margins.

4
When the co-op's financial condition permits, your board of directors/trustees decides to retire, or pay, the capital credits.

3
Your co-op allocates the margins to members as capital credits based upon their use of electricity during the year.

National Cut Your Energy Costs Day

If you resolved to spend less and save more in 2021, cutting back on a few regular expenses is a good place to start. Sunday, Jan. 10, is National Cut Your Energy Costs Day, so we've rounded up a few tips to help you trim your utility bills without making major lifestyle changes.

- **Cut heating and cooling costs.** We spend a great deal of energy heating our homes in the winter and keeping them cool in the summer, but are we really doing our best to minimize the cost of our comfort? A programmable thermostat can allow you to adjust the temperature when you're out of the house or sleeping. There's no reason to blast the heat when everyone is at work, and it's doubtful you need to sleep with the heat on high. So program your schedule into your thermostat, and it'll do all the work for you.
- **Watch out for energy draining appliances.** Big appliances like refrigerators, washers and dryers consume a lot of energy, so the next time you replace one of these appliances, upgrade to an energy-efficient Energy Star-certified model. These are designed to use much less energy than their older counterparts and often end up paying for themselves in savings over time. Keep these appliances clean and well maintained to ensure optimal performance and efficiency.
- **Pull the plug.** As we continue to be more and more "plugged in," it should come as no surprise that a greater proportion of our energy goes toward keeping our devices charged. To keep costs reasonable, plug electronics into a power strip and turn it off when they're not in use. This cuts off "phantom" usage and can save you a bundle. Some newer power strips even include an automatic shut-off feature.
- **Hit the lights.** As always, turn off the lights when leaving a room. You can also swap out light bulbs to increase your home's energy efficiency. Replace incandescent bulbs with LED versions for an easy and affordable way to save on electricity. Not only do LEDs last significantly longer, they also require much less energy.
- **Start with a simple home assessment.** Interested to know how your home's energy use compares to similar homes? Check out Energy Star's Home Energy Yardstick at energystar.gov to learn how much of your home's energy use is related to heating and cooling versus other appliance use, lighting and hot water.

Want to know more about South Dakota's rural electric cooperative system? Check out our newly redesigned website at www.sdrea.coop. You'll find lots of useful information about our generation, transmission and distribution systems, energy efficiency ideas, legislative issues that impact electric rates, a statewide outage map and much more.

KIDS CORNER SAFETY POSTER

"Watch Out for Downed Power Lines!"

Gracie Richter, 9 years old

Gracie is a resident of Buffalo, S.D., and is the daughter of Jody Richter. They are members of Grand Electric Cooperative.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

Warm and Cozy Soups

Tomato-Tortellini Soup

- | | |
|--|---------------------------------------|
| 2 - 14 ounce cans
reduced-sodium chicken
broth | cheese spread with chive
and onion |
| 1 - 9 ounce package of
refrigerated tortellini | 1 - can tomato soup |
| 1 - 8 ounce tub cream | Fresh chives (optional) |

In a medium sauce pan bring broth to a boil. Add tortellini then reduce heat to simmer uncovered for 5 minutes. In a bowl whisk 1/3 cup of hot broth into the cream cheese spread. Whisk until smooth. Pour contents into sauce pan. Stir in tomato soup and heat through. Serve with fresh chives, if desired.

Family Features/Better Homes and Gardens

Slow Cooker Split Pea Soup

- | | |
|--|---------------------------|
| 1 lb. dried green split peas
(rinsed) | 2 cloves garlic, minced |
| 1 cup sliced carrots | 1 bay leaf |
| 2 stalks celery, diced, plus
leaves | 1/4 cup chopped parsley |
| 2 cups chopped onion | 6 cups chicken broth |
| | salt and pepper, to taste |

Layer ingredients in slow cooker in order given, adding broth last. DO NOT stir ingredients. Cover and cook on high for 4-5 hours or low for 8-10 hours until peas are very soft.

Gail Lyngstad, Pierre, SD

Baked Potato Soup

- | | |
|---|---|
| 2/3 cup butter | 6 slices of bacon, cooked
and crumbled |
| 2/3 cup flour | 1-1/2 cups shredded sharp
cheddar cheese |
| 7 cups milk | 1 cup sour cream |
| 4 to 6 baked potatoes,
peeled and cooled | 3/4 teaspoon salt |
| 4 green onions chopped | 1/2 teaspoon pepper |

Melt butter, add flour and stir until smooth. Add milk and stir. Add potatoes and onion. Cook until mixture comes to a boil. Turn to low heat immediately and add bacon, cheese, sour cream, salt and pepper. Stir well. Makes 1 crockpot full.

Terri Halstead, Sioux Falls, SD

Clam Chowder

- | | |
|---------------------------------------|---|
| 4 slices thick bacon cut and
fried | 4 cans 6.5 oz. minced clams
(save juice) |
| 1 onion | 1 15-oz. can chicken broth |
| 1 cup celery | 2 potatoes |
| 1/3 cup flour | 2 cups cream |
| 1 tsp. pepper | 1 bay leaf |

Cut and fry bacon. Add diced onion and celery and cook about five minutes. Stir in 1/3 cup flour using the drained clam juice until slightly thick. Add 1 teaspoon pepper, one can broth, 4 cans clams, 2 diced potatoes and one bay leaf. Cook until potatoes are tender, about 10 minutes. Add cream. Enjoy!

Sharon Waltner, Freeman, SD

My Mother's Tomato Soup

- | | |
|--|----------------|
| 2 cups tomato juice or
pureed canned tomatoes | 1 qt. milk |
| 1/2 tsp. soda | salt to taste |
| | 1 tbsp. butter |

Combine tomatoes or juice with soda in a saucepan. Let froth up. Add milk, salt and butter. Heat and serve.

Doris Ekberg, Hamill, SD

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2021. All entries must include your name, mailing address, telephone number and cooperative name.

This Year, Organize Your Energy

Pat Keegan

Collaborative Efficiency

If you plan to live in your home for many years to come, hiring an energy auditor may be the best investment you can make.

Pat Keegan and Brad Thiessen of Collaborative Efficiency write on energy efficiency topics for the National Rural Electric Cooperative Association, the national trade association representing more than 900 local electric cooperatives. From growing suburbs to remote farming communities, electric co-ops serve as engines of economic development for 42 million Americans across 56% of the nation's landscape. For additional energy tips and information on Collaborative Efficiency visit: www.collaborativeefficiency.com/energytips.

Dear Pat and Brad: Last year brought financial hardships, and with a new year ahead, I'm looking for new ways to save money. I know there are things I can do to save energy at home and lower my monthly bills. Can you share a few ideas on how to start the year off right by saving energy? – Amy

Dear Amy: You bet! Here are a few simple tips to help you get organized and start an achievable path to saving energy. First, we'll take a look at three important steps when considering energy efficiency projects: information gathering, planning and taking action.

Start by gathering information. Begin by reviewing your 2019 energy bills. Knowing how and when you use energy can help you decide how ambitious your plan should be. If you have questions about your past bills or energy use, give your electric co-op a call - they're available to help you understand your energy bills. Your co-op may also offer a free app that can show you exact data about your home energy use.

Next, visit your electric co-op's website to see if they offer additional assistance, like energy improvement rebates, free energy audits or other special rates and programs.

Finally, the most important step is to schedule an energy audit, or conduct an online energy audit. (Remember: your electric co-op may offer free audits.) If you plan to live in your home for many years to come, hiring an energy auditor may be the best investment you can make. An energy auditor can tell you which energy efficiency actions will save you the most money or provide the biggest improvement in comfort. If you're looking for a faster, DIY (socially distanced) method, try an online energy audit like energystar.gov's Home Energy Yardstick.

Develop a plan. Now that you've gathered the information you need, you can develop a plan. It can be simple or more comprehensive. If your priority is cutting energy costs, you can select the measure that will deliver the most savings. Maybe you're already planning to do work on your home, such as roofing or renovating, and you can incorporate energy efficiency strategies into that project. To complete your plan, you'll likely need to check with local contractors or suppliers about costs.

Take action. Now that your planning is done, it's time to take action. If you're tackling any major energy efficiency projects that require a contractor, remember to do your research and hire a licensed, reputable professional.

In addition to energy efficiency projects and upgrades, there are other ways you can get organized to save energy:

- **Replace filters regularly.** A clean filter can improve the performance of your heating and cooling system, and reduce the electricity needed to pump air through your ductwork. Replace the filter now if it's been a while, then set a reminder on your phone, online calendar or paper calendar for the next replacement. Filters should be replaced every month if you're using an inexpensive filter, or every three months if you're using a higher-quality filter. A better filter will do a better job and last longer.
- **Program your thermostat.** Heating and cooling your home account for the most energy use, so setting your thermostat to match your lifestyle can make a major difference. If you don't have a programmable or smart thermostat, get in the habit of manually adjusting your thermostat throughout the day or setting it to the most energy efficient setting when you're away.
- **Label the circuits in your breaker box.** It may not reduce your energy use, but it's an easy way to get organized and will save a lot of headaches down the line!

We hope by taking a little time to complete these steps, you'll be well on your way to a more energy efficient 2021!

Indigenous Front Man Mato Nanji Eager to Get Back on the Road

Billy Gibson

billy.gibson@sdrea.coop

Mato Nanji is too gentle of spirit to be compared to a lion looking to leap out of a cage.

But ever since the blues and rock guitarist was blocked from touring by COVID-19 restrictions, he's been positively itching to get back out on the road.

Nanji, the front man for the band Indigenous, was reared on the Yankton Sioux Reservation. And that's where he's been sidelined since the coronavirus disrupted the highly popular Experience Jimi Hendrix tour last spring.

The soulful guitar slinger was in his prime element traveling around the country playing with some of his heroes, including former Hendrix bandmate Billy Cox, David Hidalgo of Los Lobos and Louisiana-born blues legend Buddy Guy. But last spring he returned to southeast South Dakota and has been spending ample time with his wife and collaborator, Leah, and their five children.

One of those children is 20-year-old Evan, who has joined Indigenous on rhythm guitar, along with Nanji's childhood friends Curt Olsen on drums and Justin Cournoyer on bass. They've been composing new songs, working on developing their sound and plan to do some touring of their own after the pandemic subsides.

"It's been great being here and being back home with family," said Nanji, 46. "I've been out playing since I was 18, so it's good to have a break. But I can't wait for the next opportunity to get out on the road. It's in my blood."

Music really is in Nanji's blood. He was inspired to pursue music by his father, who introduced him to the work of artists like Otis Redding, Jimmy Reed and Carlos

Santana. A big source of inspiration was the late Stevie Ray Vaughn and his band Double Trouble.

When on tour with the Experience Hendrix show, Nanji often finds himself sharing the stage with Double Trouble bassist Tommy Shannon and drummer Chris "Whipper" Layton.

"Chris and Tommy are great guys and very talented," Nanji said. "I remember I was about 15 when Stevie Ray came through Sioux Falls, but I didn't get to see him. He inspired thousands of players. My dad brought home the album 'Couldn't Stand the Weather' and said, 'Check this out.' It blew me away. He had such a great feeling and vibe. It's an honor for me to play with members of his band and try to capture that tone. It's very inspiring for me."

Vaughn died in a helicopter crash not long after that Sioux Falls tour stop.

Along with getting Indigenous back into top form and headlining some of the Native American fair and festival events around the country, Nanji said he also has another goal to have the Experience Hendrix tour make a stop in South Dakota next year.

"It's an incredible show and I feel honored to play with such outstanding musicians," he said. "It's a special event and it's something I want to bring to the fans in

Indigenous front man Mato Nanji is eager to get back on tour with his band Indigenous in 2021. Photo courtesy of Experience Hendrix Tour.

South Dakota. I think it's something they'd really enjoy. It's good to come back home and be around people you grew up with."

In the meantime, Nanji will continue composing, collaborating and co-writing with Leah. They grew up together on the Yankton Reservation - which he calls his "base" - and were high school sweethearts. Leah typically comes up with a melody and then Mato fills in with the musical hooks, themes, tempos and riffs.

More than anything, he's grateful to be able to integrate his musical pursuits and the closeness of his family.

"Evan is a great kid. He's talented, and it's a thrill to have him in the band," he said. "Leah is also a great talent and always has new and refreshing ideas. A lot of musicians are into going out to parties after the show. I like going out, playing, and then coming home to my family."

Tourism in South Dakota has remained robust despite the impact of the global pandemic.

SD TOURISM GOING STRONG

Tired of Being Shut In: Visitors Flock to South Dakota

Billy Gibson

billy.gibson@sdrea.coop

Probably the last time a member of the Hustead family was worried about going broke, it was back in the 1930s.

Ted and Dorothy Hustead had just purchased a small drug store in Wall and were having a hard time getting the business to grow in the middle of a severe drought and the Great Depression.

The business that went on to become known as Wall Drug has been named one of the busiest tourist attractions in the northern part of the country. The prospects of the Husteads going broke have been very slim since the store hit its stride.

That is until last March.

Third-generation owner Rick Hustead won't lie: he was downright worried that Wall Drug might bite the dust when COVID-19 prompted lockdowns and travel restrictions.

The entire operation – the stores, the restaurants, the galleries and even the free ice water – came grinding to a stop for 71 days just as the travel season was about to kick into gear.

"I was afraid we might go broke and we might not make it. They're projecting that half of the restaurants out there are going to close down permanently," Hustead said. "We were closed that whole time and had to cut back on our employees because we felt that trying to 'flatten the curve' was the right thing to do."

The business reported losses through the summer, but returned to the black in August due in part to traffic from the Sturgis motorcycle rally. Hustead reported that September and October also showed considerable increases over 2019 numbers.

"People just got tired of being shut in and they got in their cars and on their motorcycles and their RVs and came to South Dakota," he said, noting that even President Trump made his way to Mount Rushmore for a Fourth of July gathering.

The annual Buffalo Round Up at Custer State Park continues to attract visitors from throughout the country.

The Thing I Love Most about Living in South Dakota is...

What do you love most about living in South Dakota? Share your thoughts with us (200 words or less) and you could win a \$25 gift card!

Send your response to editor@sdrea.coop by Jan. 4, and don't forget to include your contact information.

Hustead said he took public safety measures such as installing Plexiglas barriers, posting hand-sanitizer stations and requiring that employees wear masks. He said no employees have been known to contract the coronavirus. The bottom line also received a boost from some federal relief money.

Once the financial fog lifted, Hustead called his mother Marjorie – who is in a care facility in Rapid City but is “still involved in the business” – and told her he felt Wall Drug was going to make it through the crisis after all.

“I told her, ‘Mom, I think we’re going to make it.’ And that made her happy,” Hustead said.

He was quick to heap praise on the South Dakota Office of Tourism and leader Jim Hagen.

In assessing the state of tourism in South Dakota, officials paint a picture similar to Hustead. While many annual events have been canceled or postponed to a later date, outdoor events and activities such as Sturgis, walleye fishing, pheasant hunting and the many outdoor tourist attractions have led to a healthy industry performance and outlook.

Hagen’s office has also taken the initiative to develop innovative programs to ensure that South Dakota stays top-of-mind when people throughout the region and nation make their travel plans.

The department recently launched an on-line learning program for children and their families to learn more about South Dakota and experience the attractions of the state from the comfort of their homes or in a classroom setting. There are eight virtual pages that allow site visitors to learn more about the icons, wildlife, people and history of the state, each featuring games and activities for the entire family to explore.

“These online lessons provide an opportunity to educate children and adults alike about our state’s Great Faces and Great Places,” said Gov. Kristi Noem. “We hope that they are used as a tool to engage families

and inspire them to explore our great state.”

The department also partnered with Badlands National Park to promote its virtual Junior Ranger program. Once the virtual exploration is complete, kids can become official Badlands National Park Junior Rangers.

Last summer, the department teamed up with tourism officials in Wyoming to develop a program called “Black to Yellow” to entice travelers to explore scenic routes that wind from the Badlands National Park to Wyoming’s iconic Yellowstone National Park.

To help travelers plan their trip, the states put together itineraries that explore their most well-known attractions and lesser-known gems. From taking in roadside stops, like Wall Drug and Wyoming’s Devils Tower, to exploring the scenery of Bighorn Canyon National Recreation Area and Badlands National Park, travelers were encouraged to explore the beauty of the states’ wide open spaces, unparalleled wildlife and the freedom of the open road.

State tourism leaders will meet in Pierre on Jan. 20-21 for the 2021 Governor’s Conference on Tourism. There will be limited in-person engagement as well as an online attendance option. The theme for this year’s meeting is, “Onward!” While 2020 could have been worse, leaders are hoping that travel will continue to be a significant economic driver in the state.

Seeking Director Candidates

Codington-Clark Electric Co-op Secretary Ben Schleusner announces nominating petition forms are available from the co-op's business office for any co-op member residing in District 1, 3 or 7 interested in serving on Codington-Clark's board of directors.

Deadline for submitting nominating petitions is 4:30 p.m., Thursday, February 18, 2021. A valid petition needs the signatures of a least 15 members from the district. Secretary Ben Schleusner will only accept petition forms supplied by the co-op.

The names of qualified candidates will appear on the director election ballot at the co-op's annual membership meeting scheduled for Tuesday, March 30, 2021, at the Codington County Extension Complex in Watertown.

District 1 includes all area served or to be served north of the north boundary lines of Codington and Clark Counties. Mike Meland, Wheatland Township in Day County, currently represents District 1.

District 3 includes all area served or to be served in Eden, Dexter, Fuller and Phipps Townships in Codington County. Ben Fleming, Fuller Township, currently represents District 3.

District 7 includes all area served or to be served in Ash, Garfield, Logan, Raymond, Spring Valley, Warren and Woodland Townships in Clark County and all area west of the above-named townships that adjoins the boundary line of Clark County. Russ Hurlbert, Logan Township, currently represents District 7.

Summary About Directors

General Powers

A board of nine directors manages the business and affairs of the Cooperative. The board exercises all of the powers of the Cooperative except those conferred upon or reserved to the members by law, the articles of conversion or the bylaws. The board hires a general manager to run the business on a day-to-day basis.

Districts

The Cooperative's service area is divided into nine districts, each with defined boundaries. One director represents each district.

Nominations

Any fifteen (15) or more members of the same district affixing their signatures to a petition provided by the Cooperative can nominate a qualified person as a candidate for director from their district.

Director Qualifications

No person shall be eligible to become or remain a director or to hold any position of trust in the Cooperative who:

- Is not a member and bona fide resident physically residing in the area served or to be served by the Cooperative and in the district which the member is to represent; or
- Is in any way employed by or financially interested in a competing enterprise or a business selling electric energy or supplies to the Cooperative; or
- Is an employee of the Cooperative or was an employee of the Cooperative and less than three (3) years have passed since the last day of employment; is a close relative of an employee of the Cooperative; or is a close relative of an incumbent director. As used by these bylaws, close relative means a person who, by blood or in-law, including half, foster, step and adoptive

kin, is either a spouse, child, grandchild, parent, grandparent, brother, sister, uncle, aunt, nephew or niece of the principal; or

- Does not have the legal capacity to enter into a binding contract.

Election

The Cooperative's members attending the annual membership meeting elect directors by printed ballot. The candidate from each district receiving the highest number of votes is declared the elected director from the particular district. Drawing by lot resolves tie votes.

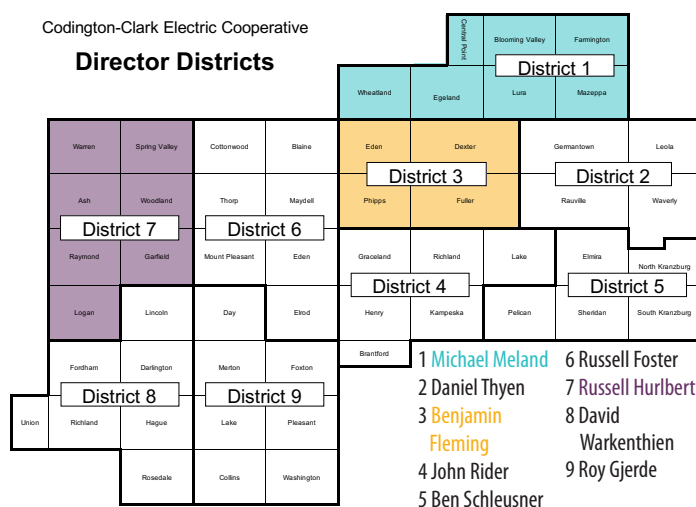

Tenure

Elected directors serve a three (3) year term. Upon election, directors serve until the annual membership meeting of the year in which their terms expire or until their successors are elected and qualified.

Compensation

Directors do not receive any salary for their services as directors. Directors do receive a fixed sum and expenses while on Cooperative business as a member of the board.

No director receives compensation for serving the Cooperative in any other capacity, nor does any close relative of a director receive compensation for serving the Cooperative, unless the payment and amount of compensation is specifically authorized by a vote of the members or the service by such director or close relative is certified by the board as an emergency measure.

Operation Round Up®

Applications Being Accepted

The Codington-Clark Electric Board of Directors made the decision to implement the Operation Round-Up program in adherence to the cooperative principle "Concern for Community". Through the program Co-op members volunteer to "round up" the amount owed on electric bills to the next highest dollar amount and contribute the change to the Operation Round Up Fund. The purpose of the program is to provide charitable contributions that promote the welfare of people in the community and improve their quality of life.

Since 2011, numerous Codington-Clark members and employees have opted to participate in the program and have

generously contributed to the fund. If you are interested in applying for funds please call 886-5848, stop by the office to pick up an application or go online to www.ccelec-tric.coop, click on the community tab and look for Operation Round Up. Any application that would positively affect the general welfare of the community will be considered. The deadline for applying is February 11, 2021.

Codington-Clark Electric has Marathon® lifetime warranty water heaters available.

100-gallon tank rebate = \$600

85-gallon tank rebate = \$510

Monthly electric bill credit = \$5

Must be connected to a load management device to receive the rebate and bill credit.

Please call us at 605-886-5848 for details.

Privacy Notice

Codington-Clark Electric Cooperative Inc. has always been committed to protecting the privacy and security of personal information we collect from or about our member-consumers in the normal course of business. We are providing this notice to you to assure you of our commitment to maintaining the privacy of such information.

Collection of Information

We may collect nonpublic personal information about you from the following sources:

- Information we receive from you on applications or other forms;
- Information about your transactions with us, our affiliates or others; and

Ice fishing is a pursuit that's enjoyed each winter by South Dakotans of every stripe.

Guys, Gals and Castles on Ice

South Dakotans Stay in Hot Pursuit of Cold Fish

Billy Gibson

billy.gibson@sdrea.coop

What happens if you hold an ice fishing tournament and it turns out there's no ice?

You improvise.

That's what organizers of the annual Mobridge Ice Fishing Tournament had to do 10 years ago when Mother Nature refused to cooperate and left them scrambling to come up with a Plan B.

At that time, the tournament was just gaining traction as a main winter attraction for Mobridge. No one dreamed that what started as just a handful of anglers vying to win an ice auger has grown into a field that's capped at 525 two-person teams arriving from 16 different states.

Jeff Jackson is owner of the Wrangler Inn in Mobridge and one of the founders of the tournament marking its 20th anniversary this year. He remembers a bit of panic setting in when hundreds of fishermen were scheduled to descend on Mobridge and the ice on the Missouri River wasn't thick enough to ensure the safety of competitors. Fortunately, the organizing committee had scheduled enough attractions and activities around the one-day tournament that there was plenty for the eager visitors to do.

"We got the word out that the competition was canceled, but 420 out of the 450 teams that were registered showed up anyway," Jackson recalls. "They wanted to come and have a good time."

Those non-angling activities included raffles and prize drawings, an expo featuring all the latest fishing gear, gizmos and gadgets, and according to Jackson, lots of libations.

"People keep coming back year after year," Jackson said, noting that the town's population doubles in the second week of each January. "We've had to limit the number of participants so we have an Ebay auction for three spots that can go as high as \$3,000, and we have another lottery drawing for 26 spots where we usually have up to 800 names."

Instead of a simple ice auger as a grand prize, today the tournament gives away roughly \$225,000 in prizes, including Ice

Hundreds were in attendance at the Dakota Anglers Fishing Expo in Sioux Falls. Photo provided by Dakota Angler.

Castles, four-wheelers, a Polaris Ranger, \$5,000 worth of Scheel's gear, \$3,000 in Runnings gear, clam shacks and more.

The tournament is a boon for Mobridge, bringing an economic impact of \$500,000. According to Jesse Konold, chairman of the town's tourism committee, over the past four years proceeds paid for South Dakota's first climate-controlled indoor fish cleaning station, ADA compliant bathrooms, improvements to the town's rodeo grounds and more than \$100,000 in donations to local non-profits. This year's tournament will be held Jan. 7-9 at the Sherr-Howe Center in Mobridge.

Not Everyone is Hooked

Among the state's population of electric cooperative linemen, there are many who look forward to chasing walleye in winter. In Josh Lemburg's case, the term "chasing" walleye would be close to accurate.

Lemburg, operations foreman at Moreau-Grand Electric who lives in Timber Lake, prefers to stay on the move when he fishes on the ice. Eschewing the "ice castle" approach that calls for staking out a spot and staying put for the weekend, Lemburg uses a portable flip-over shack and keeps his auger close at hand.

"Ice castles are fun, but I'm not afraid to move around and dig holes," he said. "If I'm not catching fish in an hour, I'll 'run-and-gun' til I find them."

Even with his "move-and-groove" approach, Lemburg has failed to get his entire family sold on the merits of ice fishing. Even hooking a lunker walleye didn't

convince his son to swear a life-long oath to ice fishing.

Several years ago, Lemburg took his dad and his elementary-age kids, Landon and Kendal, out on the ice. His dad and daughter were in one shack and he and Landon were in the other. After a few hours, just as Landon was getting bored and ready to call it a day, a walleye snatched his bait.

"Landon had his line in the water and I saw a big mark on my Vexilar," Lemburg recalls. "I told him he had a big fish on the line but he just gave me his pole and said he wasn't interested. I kept trying to get him to reel it in, but he kept giving me the pole back. Finally, I got the fish to the surface I looked in the hole and there was nothing but fish. My dad reached down in the water to his armpits and it was a 12-pound walleye."

Brent Reilley is an electrician at Selby-based Cam Wal Electric, which serves the Mobridge area. Over the past 20 years, he has only missed the tournament twice - once when he had to decide between ice fishing and a week in Cancun.

He and his wife, Tandy, have actually both claimed titles at the prestigious Mobridge tournament. One particular year the husband-and-wife duo were on separate teams. Brent was on the first-place team and Tandy and her partner placed second. But Tandy believes she has her

husband beat: her second-place finish was clinched by reeling in a 25-inch walleye while she was six months pregnant.

The two have always had pretty good luck with the raffles and random prize drawings as well. Tandy won a side-by-side one year and a family friend has won two four-wheelers.

"We just love being outdoors in the winter when there's nothing else to do," Reilley said. "You can get outside and enjoy the fresh air. It gets cold, but it beats sitting inside and it's something great to do with the family. My son is addicted. He'd love it if all he could do is fish all day."

Seasonal Affective Disorder impacts roughly 10 million Americans each year. Experts are anticipating a rise in cases after many months of dealing with COVID-19.

BEATING SAD

Here's How to Treat and Beat Seasonal Affective Disorder

Billy Gibson

billy.gibson@sdrea.coop

For years, the mental disorder now known as Seasonal Affective Disorder (SAD) was given about as much credibility as Big Foot and the Loch Ness monster.

It was common folk knowledge that certain times of the year brought on what was passed off as the “winter blues” or the “winter doldrums.” But through considerable study and extensive research over the course of time, the psychiatric community eventually determined that SAD is not only a real affliction related to clinical depression, but according to the National Institute of Health it impacts an estimated 10 million Americans each year.

Women are more likely to contract the condition than men, and in most cases symptoms can begin appearing in early adulthood. Those with pre-existing mental conditions such as bipolar disorder, attention-deficit/hyperactivity disorder, anxiety disorder and others are also at significantly greater risk.

And while so much attention has been given to the coronavirus since the spring of 2020, SAD is yet another health risk that continues to afflict the U.S. population and especially those residing in northern regions of the country.

Mental health professionals share a concern that those who are susceptible to SAD will experience an even greater struggle in

2021 and have more difficulty managing their symptoms during the winter months after nearly a year of dealing with the forced shutdowns and isolation caused by COVID-19.

Both employees and members of South Dakota's electric cooperative system are prone to experiencing the impact of SAD as the winter season sets in, according to Mark Patterson, Director of Safety and Loss Control at the South Dakota Rural Electric Association (SDREA) in Pierre.

Patterson and his accredited safety team at SDREA provide a variety of field and workplace training programs for the state's cooperative network, and they advise everyone to be aware of the signs and symptoms of SAD and to seek treatment if needed.

“These long South Dakota winters can be harsh,” Patterson said. “But in order for our cooperative employees to be at their best

and perform at the top of their game, we need to make sure we're mindful of our risk of experiencing not only physical ailments that can limit our capabilities but mental ailments as

Tracy Romey: "The good news is that SAD can be treated."

well. That also goes for all of our cooperative members that we serve. If you're feeling the onset of depression and having difficulty coping, don't hesitate to reach out and find the help you need."

The most commonly reported symptoms associated with SAD include significant fatigue, pervasively sad mood, loss of interest in activities, sleeping more hours than usual, difficulty concentrating and eating more starches and sweets.

Experts also point out that the "seasonal" in SAD doesn't necessarily refer to winter, although symptoms occur most commonly in January and February. Clinical depression can also occur in the spring and summer months, a condition known as summer-pattern SAD.

For winter-pattern SAD, a gradual decrease in photoperiod – or daylight – is the primary trigger and the strongest predictor of daily mood swings in individuals. Researchers have identified a direct relationship with the number of cases that rise and fall depending on available sunlight and change in temperature in a particular year. Sunlight prompts the body to produce hormones, which has a direct impact on a person's mood. For instance, inconsistent levels of the neurotransmitter

Signs and Symptoms of SAD

- Feeling depressed most of the day, nearly every day
- Losing interest in activities you once enjoyed
- Experiencing changes in appetite or weight
- Having problems with sleep
- Feeling sluggish or agitated
- Having low energy
- Feeling hopeless or worthless
- Having difficulty concentrating
- Having frequent thoughts of death or suicide
- Oversleeping (hypersomnia)
- Overeating, particularly with a craving for carbohydrates

serotonin can alter moods while changes in melatonin levels can interrupt sleep cycles.

Mental health providers are bracing for an anticipated increase in cases of SAD this year due to the pandemic and lockdown. Those with underlying mental conditions who are especially sensitive to stress could face severe challenges.

According to Tracy Romey, a board certified psychiatric mental health nurse practitioner in Hot Springs, those susceptible to SAD should not despair; many forms of treatment are available.

"This is the time of year we start seeing more cases of SAD. Anxiety can be a component of SAD, which negatively impacts everyday functioning," she said. "The good news is that it can be treated and usually improves when spring arrives."

Romey added that treatment is often

tailored to the individual and can be directed toward certain prevailing symptoms.

"There is no specific test for SAD, however, the same treatments prescribed for a major seasonal depressive disorder may be effective for seasonal affective disorder, including light therapy, vitamin D replacement therapy and medications. Other options include spending more time outdoors and exercise. I encourage anyone who is negatively affected by seasonal change to see your mental health provider and receive an evaluation."

Those who find themselves in immediate distress can call the National Suicide Prevention Lifeline toll-free at 1-800-273-TALK (8255) or the toll-free TTY number at 1-800-799-4TTY (4889). Also available is the Crisis Text Line (HELLO to 741741) and the National Suicide Prevention Lifeline website, <https://suicidepreventionlifeline.org>.
