2027 Rate Increase

Dave Eide
General Manager
C. 605-350-2765
davee@ccelectric.coop

As I've mentioned in past newsletters, Basin Electric, one of our wholesale electric power suppliers, is implementing a 2-year stage of rate increases. The first increase took place on Jan. 1, 2026. The second increase will take place Jan. 1, 2027. There are four reasons why Basin is seeing cost increases; growth in traditional loads requiring new transmission and generation, an increase in Southwest Power Pool planning reserve margins, commodity price variability, and investments in system reliability.

The Codington-Clark Electric board opted to spread these rate increases over a three-year period. On Jan. 1, 2026, a 5.7% overall rate increase was implemented. A yet to be determined rate increase will take place Jan. 1, 2027, with hopes of a final rate increase taking place on Jan. 1, 2028.

The ability to spread these rate increases over a three-year period is made possible through the use of our margin stabilization fund.

In the coming weeks, we plan to complete a cost-of-service study. Results will be presented to the board for input at the Nov. board meeting. A final decision on the 2027 increase will be made at the Dec. board meeting.

Construction Work

Our linemen have been busy this summer with line construction and will continue to finish things up into the fall. I'll mention where we're at with some of the larger projects. We buried a 7-mile stretch of 4/0 three-phase cable between the Florence and Rauville substations and a 4.5-mile stretch of 4/0 three-phase cable northwest of Clark. The new line has been cut in and energized. Both of these projects replaced overhead line; retirement will be done this winter.

All of the line burials for the Highway 25 project north of Highway 212 have been completed. New services to three, three-phase bin sites were completed this summer along with new service installations to several new homes. Several new services need to be plowed in before freeze-up.

We also plan to plow in two FEMA premitigation line projects yet this fall, a 2-mile stretch of line southwest of Bradley and a 1-mile stretch west of Crocker. Both of these lines will be the burial of single-phase overhead lines. The co-op's distribution system is in very good shape, keeping outage times to a minimum.

New Transmission

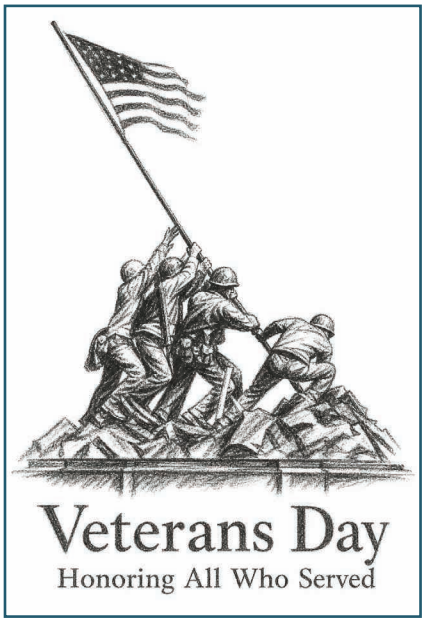

East River Electric is currently completing the new transmission line from the Watertown WAPA substation east of Watertown to the Waverly substation north of town. When this project is complete, it will eliminate the transmission line going right through the city of Watertown, and East River will have the ability to switch transmission lines going north on a set of breakers and west on a set of breakers from the Watertown WAPA substation. Right now, there is only one set of breakers in the Watertown WAPA substation feeding the north and west transmission lines. This will be a big bonus to Codington-Clark Electric members as outage times will be shortened with multiple transmission feed capabilities.

Veterans Day

With Veterans Day right around the corner, I'd like to thank all those who have served our great nation. Without those willing to serve or have served, we certainly wouldn't be where we are today. I'd like to share the following quote, one of my favorites, by Charles M. Province.

"It is the Soldier, not the minister
Who has given us freedom of religion.
It is the Soldier, not the reporter
Who has given us freedom of the press.
It is the Soldier, not the poet
Who has given us freedom of speech.
It is the Soldier, not the campus organizer
Who has given us freedom to protest.
It is the Soldier, not the lawyer
Who has given us the right to a fair trial.
It is the Soldier, not the politician
Who has given us the right to vote.
It is the Soldier who salutes the flag,
Who serves beneath the flag,
And whose coffin is draped by the flag,
Who allows the protester to burn the flag."

Have a great Veterans Day!

Years of Service

East River Electric recently held their annual meeting where former Codington-Clark Electric Director Dave Warkenthien, left, was recognized by General Manager Bob Sahr for his years of service. Congratulations Dave!

KEEP SAFETY AT THE HEART OF YOUR HOLIDAY CELEBRATIONS

The holiday season, stretching from late November through mid-January, is widely considered the most joyous time of the year. Families gather, festive parties fill our calendars, and a spirit of generosity warms our homes. However, alongside the cheer comes a significant spike in travel, home decorating, and large-scale cooking. Consequently, preventable accidents and injuries dramatically increase during these months. To ensure your family and friends remain safe and injury-free throughout the festivities, keeping safety top of mind is crucial. Below is a comprehensive guide of tried-and-true advice to help you navigate the season securely.

Traveling for the Holidays? Be Prepared and Alert

For millions of people, the holidays mean hitting the road to visit loved ones. Unfortunately, car travel during this busy period carries the highest fatality rate of any major transportation form. Hundreds tragically lose their lives in crashes on Thanksgiving, Christmas, and New Year's Day alone. Alarmingly, alcohol impairment contributes to approximately one-third of these fatal incidents.

To stay safe on the roads, follow these essential guidelines:

- Winterize your vehicle: Prepare for harsh weather and keep a well-stocked emergency kit in your trunk.
- Rest up: Get plenty of sleep before departing to avoid the severe dangers of drowsy driving.
- Plan ahead: Leave early and anticipate heavy traffic to eliminate the dangerous temptation to speed.
- Buckle up: Ensure every passenger is properly restrained, regardless of the trip's length.
- Eliminate distractions: Put your cell phone away; it remains the primary driving distraction today.
- Designate a driver: Always use a completely sober driver. Alcohol and medications cause severe impairment.

Decorate with Caution and Care

Decking the halls instantly puts families in a holiday mood, but hospital emergency departments treat thousands of decorating-related injuries annually. Remember these safety tips:

- Keep poisonous seasonal plants, like mistletoe and holly berries, strictly out of the reach of children.
- If utilizing an artificial tree, verify it is clearly labeled as "fire resistant."
- For live trees, cut two inches off the trunk for better water absorption. Water daily and remove it when dry.
- Place your tree at least three feet away from fireplaces, radiators, and space heaters.
- Discard and replace light sets featuring broken sockets, frayed wires, or loose electrical connections.
- Turn off all holiday lights before going to bed or leaving the house.

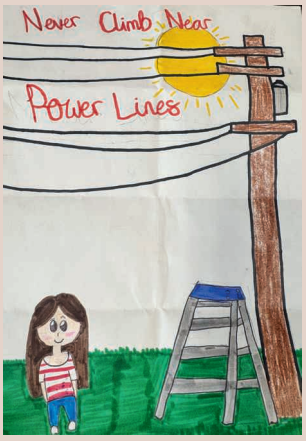

Watch Out for Holiday Fire-Starters

The glow of candles and fireplaces is a holiday staple, but combined with combustible decorations, house fire risks skyrocket. The National Fire Protection Association notes candles cause 46% of December home fires.

- Place candles in sturdy holders away from curtains and curious children.
- Store matches and lighters in a locked, high cabinet.
- Consider battery-operated flameless candles as a very safe alternative.
- Never burn pine branches or wrapping paper in fireplaces; they can cause flash fires.
- Use a protective screen for burning fires and never leave lit candles unattended.

Be highly alert to the extreme dangers of turkey fryers. Hundreds of fires and severe burns are linked to these devices. Consider using oil-less fryers or purchasing fried turkeys from professionals. If you must fry your own, strictly follow all U.S. Fire Administration guidelines.

By taking these simple, proactive steps, you can protect loved ones and ensure your holidays remain merry, bright, and safe.

"Never climb near power lines."

Penelope Poppen

Penelope warns readers to never climb near power lines. Thank you for sharing, Penelope! Penelope's parents are Brett and Megan Poppen, members of Black Hills Electric Cooperative.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

THE FAMILY TABLE

ENCHILADA CASSEROLE

Ingredients:

1 lb. hamburger
1 medium onion, chopped
1 green pepper, chopped
1 can (10 oz.) enchilada sauce
6 tortilla shells
1 cup shredded cheese
1 can pinto beans

Method

In a glass baking dish, put the browned hamburger, onion, pepper, beans and sauce in shells and roll up. Layer with shredded cheese on top. Bake 20 minutes in oven.
Optional: Use 1 cup of sliced black olives on top of cheese

Marla Gilbert
Southeastern Electric

PARTY IN A PAN

Ingredients:

1 1/2 lbs. hamburger, browned
1 can cream of celery soup
1 can cream of chicken soup
1 box Stove Top Stuffing Mix
1 can corn, drained
3 cups mozzarella cheese, shredded

Method

Combine the hamburger, celery soup and chicken soup in a bowl and set aside.
Prepare the Stove Top Stuffing as directed on the box. Layer half the hamburger mixture, half the corn, half the stuffing, and half the cheese; repeat layers again. Bake 30-40 minutes at 350°F or until cheese is melted.
Makes a 9x13-inch pan.

Kathy Zomer
Douglas Electric

BEEF TERIYAKI

Ingredients:

1lb. boneless beef sirloin steak
2 tbsp. cornstarch
14 oz. beef broth
2 tbsp soy sauce
1 tbsp. brown sugar
1/4 tsp. garlic powder
3 cups broccoli florets
1 1/2 cups rice
1 2/3 cups water

Method

Cook the rice in water according to the directions on the bag.
Slice beef in very thin strips. In a large skillet, saute the beef strips until browned and the juices evaporate.
In a mixing bowl, combine cornstarch, beef broth, soy sauce, brown sugar and garlic powder. Mix thoroughly.
Add the liquid mixture and broccoli florets to the beef. Cook until mixture boils & thickens to a desired consistency, stirring frequently.
Serve over the cooked rice.

Karen Soulek
Charles-Mix Electric

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2026. All entries must include your name, mailing address, phone number and cooperative name.

ENERGY-SAVING RECOMMENDATIONS FOR RENTERS

Miranda Boutelle
Efficiency Services Group

Renting a house or apartment can put you in a challenging spot when it comes to energy efficiency. Renting means that you can't make all of the decisions about energy efficient upgrades in your home. At the same time, renters are usually responsible for paying the electric bill. That means if the home has inefficient equipment, you're going to use – and pay for – more energy.

Typically, it is the owner's responsibility to make energy efficiency upgrades, such as adding insulation or new heating and cooling equipment. Don't assume they won't make upgrades. If the home needs upgrades, just ask. I've had landlords let me pay for an upgrade and provided a credit on my rent to offset the cost.

In a situation where you don't have control over all the decisions, choose to focus on what you can control.

The thermostat is a great place to save energy. Nudging the thermostat a few degrees closer to the outside temperature can help you save money. Adjust the settings when you aren't home or at night when you're sleeping. Adding thick curtains can help keep heat out in the summer and make the room feel warmer in the winter. A rug can make a cold floor feel warmer in the winter. These additions can make changing the thermostat a few degrees more comfortable.

Make sure your property owner follows through with annual maintenance and HVAC filter changes. Ignoring these can lead to unnecessary energy waste.

Lighting is another element you can typically control. If your home has incandescent or compact fluorescent bulbs, switch to efficient LEDs. If you don't have the ability to change the lighting that's installed in your home, consider using plug-in LED lighting or lamps instead.

Check whether your water heater is wasting energy. The U.S. Department of Energy recommends setting it to 120 degrees. This keeps the water hot enough to be safely stored in the tank and prevents scalding. I recommend calling the owner or property management company to request an adjustment.

One of the benefits of renting is that you aren't on the hook when equipment breaks down. If the water heater is older than 10 years or showing signs of possible failure, such as leaking, unusual noises or discolored water, let the owner know. Upgrading to a heat pump water heater could be a great fit for your home, saving energy and preventing possible damage caused by a failed water heater.

Another way to save is by finding available rebates and incentives for your home. Because renters typically pay the electric bill, a landlord doesn't see the financial benefit of monthly energy savings. You can make it easier for them by finding opportunities for energy-efficient upgrades in your home. Your rental might be eligible for insulation, water heater or HVAC upgrades. You might also be eligible for discounts on products that you can buy yourself, such as air purifiers, dehumidifiers or other small home appliances.

If your home has electric heat, adding either a ducted or ductless heat pump – also called a mini-split – provides more efficient heating as well as air conditioning. That's a popular rebate offering across the country.

Energy efficient upgrades could benefit the homeowner by increasing the property value or keeping a good renter from looking for another place to live. It doesn't hurt to ask for upgraded equipment and provide information on eligible rebates or incentives. Partnering with your landlord on projects is a great opportunity to benefit both of you.

CLASSROOM TO KOREA

Mitchell-Area Educator Recalls Year at War

Jacob Boyko
jacob.boyko@sdrea.coop

Warren Thomas was three weeks into his second year of teaching in 1951 when he got a letter in the mail. The sixth grade teacher from Mitchell, S.D., had just married his wife, Luella, that June. Now, he was being drafted to war in Korea.

"I was not happy," Thomas, 97, said. "When you've been married three months, well, you just expect to be able to settle down and get on with your career."

When the draft notice came, the Mitchell superintendent asked the draft board in Woonsocket to at least allow Thomas to finish the semester. The request was denied; Thomas wasn't a farmer, rancher or other worker eligible for an occupational deferment.

"I was just a teacher," he recalled. "And they said anybody could be a teacher."

Less than a month later, he said his goodbye to Luella. The 22 year old was taken to Fort Sill, Okla., for eight weeks of basic training. After passing that, the men boarded the troop ship and awaited their next stop in Korea.

In April of 1952, Thomas was brought to an army base near the town Kumwha, in present day north-central South Korea near the Korean Demilitarized Zone (DMZ).

Being the only college-educated soldier in the75th Field Artillery, Thomas was assigned the duties of battery clerk, which included administrative and clerical work for the unit. He described the work as routine.

"I don't claim to be a hero because I had a desk job due to my education experience," he said. "At the time I arrived in Korea, the front lines had been pretty well established."

One of Thomas' many duties included fire direction, requiring him to help direct the firing of his unit's artillery.

"We were firing our big guns on the Chinese and the North Koreans, but we couldn't get them dug out so we were in that one position," he recalled. "We fired against them and they fired against us … [They used] slave communist labor, and they dug back in the caves in the mountains, and we could see them – We were only about three miles apart in our rather static positions."

Soldiers earned points toward returning home based on their assignments, Thomas explained. Front-line infantrymen earned four points a month, reaching the required 36 points in nine months. Thomas earned three points a month in his position farther behind the lines, keeping him in Korea for a year.

Due to the stalemate, Thomas would remain in that one location. He bunked in a dugout he and a fellow soldier excavated from a hillside, counting the days before he could return home. During this period, Thomas relied on two things: his Chrsitian faith and letters from Luella.

"We wrote every day," he recalled. "I had a lot of college friends, some teaching friends and some relatives too, which a lot of the guys didn't have. During the 366 days I was on Korean soil, I received just about 500 letters by airmail."

After his military service, the couple taught school in Seattle before returning to South Dakota in 1954 to help his father on the farm. They moved into a farmhouse without running water or indoor plumbing, but Thomas was familiar with life without modern conveniences. Growing up, his family didn't get electricity until 1948 when Intercounty Electric Cooperative electrified rural Sanborn County.

Warren Thomas worked more than three decades in education.
Photo submitted by Kevin Thomas

Today, at age 97, Thomas lives on land north of Forestburg close to where he grew up decades ago without electricity.

The couple raised two sons, Kevin and Lyndon. Warren continued his career in education, becoming principal at Alpena High School and earning a master's degree in education from South Dakota State University. He retired in 1993 as principal of the Mt. Vernon Elementary School after more than 30 years in the profession.

He and Luella shared nearly 68 years of marriage before her passing in 2019.

Today, Thomas still takes opportunities to get out and learn. He has joined four Central Electric Cooperative tours of member-owned power generation facilities in North Dakota.

His memories span a childhood without electricity, a career in classrooms and a year of military service far from home. But the subject of Korea isn't one he brings up often.

"War is not good," Thomas said. "I didn't have any idea whether I'd be coming back or not because a lot of GIs were being killed in Korea. But I did survive, obviously."

HONORING OUR HEROES

Veterans Memorial Undergoing Revamp

The WWII memorial on Capitol Lake shows soldiers saluting the American flag after battle. Later, after the Korean and Vietnam soldier statues and walls were added beneath the flag, the WWII veterans appear to salute them too. *Photo by Jacob Boyko*

Jacob Boyko
jacob.boyko@sdrea.coop

Lee Leuning's father was about 80 when he sat in his son's sculpting studio to become the sailor at South Dakota's World War II memorial.

For three days, Leuning studied his face and shaped his features. His father slowly began talking about the war. After 50 years, the experience still weighed heavy.

Today, more than 25 years later, Leuning's father stands immortalized in bronze on the shore of Capitol Lake in Pierre, representing sailors like himself who served in World War II.

He stands among five other slightly larger-than-life statues representing members of the U.S. armed forces. The display, called "Why We Fought," depicts the service members in tattered uniforms saluting toward the American flag.

"It's soldiers in each individual moment stepping out of battle and recognizing the flag and what they fought for," Leuning said.

A member of Northern Electric Cooperative, Leuning created the figures with fellow sculptor Sherri Treeby. Visitors to Pierre will find their work throughout the city, including statues along the Trail of Governors and a relief plaque commemorating the Lt. Cmdr. John C. Waldron Memorial Bridge. At Capitol Lake, their sculptures honor veterans of World War II, Korea and Vietnam.

Several of the World War II figures have family connections. Leuning used his mother's likeness for the army corps mechanic – she served as a plane mechanic in WWII – and his sons as models for the pilot and Marine. Treeby's father, an Army veteran, provided the face of the Coast Guardsman.

The WWII memorial was the first memorial unveiled, dedicated by Gov. Bill Janklow just four days after the Sept. 11, 2001, terrorist attacks. Leuning recalls being amazed by the turnout – thousands of visitors were at the Capitol for the dedication.

He remembers one Navy veteran watching the dedication parade from a hospital bed with an attendant.

"Every time a flag came by with an honor guard … that guy would have his aide get him out of the bed, and he'd snap to attention," Leuning said. "That, to me, showed this really means something to them."

Recent renovation improved water drainage. Previously, water under the granite tiles caused loosening. The tiles have since been replaced with sod grass. The stream bed was also replaced. *Photo by Jacob Boyko*

Subsequent dedications for the Korean and Vietnam memorials during Gov. Mike Rounds' administration attracted even more visitors. The state estimated 32,000 people attended the two-day Vietnam dedication in 2006. Some veterans watched the ceremony from pontoon bridges on Capitol Lake.

Unfortunately, years of exposure have taken a toll on the site. Trapped water beneath the granite tiles caused some to loosen and crumble, explained Leah Haugan, Special Projects Coordinator for the South Dakota Bureau of Human Resources and Administration.

"Try as we might to keep it in great shape, you can't keep up with deteriorating stone," Haugan said.

Over the summer, the state began work on a renovation project for the memorials, which will bring some changes to the site.

Sections of granite have been replaced with grass. The military seals embedded in the walkway were lifted out and placed on pedestals. The stream from the Artesian well remains, but it's now bordered by a concrete curb. The granite tiles around the fountain were upgraded from ¾ inch thick tiles to 2 inch thick tiles, and the fountain enclosure was remade with concrete and granite tiles around the top.

Restoring the site is part of the state's commitment to honoring veterans and their service, Haugan said.

"Words are words, but when you build something like that that memorializes their efforts and their sacrifice, I think that shows them there's proof positive that we recognize and honor them," Haugan said.

The renovation does not bring back the Flaming Fountain's flame. Methane rising from the artesian well that feeds Capitol Lake kept the flame burning for decades, but it went out around 2015 when the flow could no longer sustain it. Haugan said a more ambitious fountain project is among the ideas for the site, depending on funding.

A separate proposal would honor Native American code talkers who served in World Wars I and II using their native languages to transmit messages that enemy forces were not able to translate. Funding for that memorial also remains unresolved.

Visiting the memorials, Leuning has seen what that recognition can mean to a family. The day after the Vietnam memorial dedication, he returned to take photos and was approached by a woman asking him to take her picture. He obliged, and the lady went up to the bronze statue and hugged it.

"She said, 'That's my Davy. It looks just like my Davy.'"

Then she pointed to her husband's name on the wall.

Turn on Your Heat Breakers

Electric Heat is Clean, Safe, Reliable

Please check to see that any breakers in your electric service panel that control electric heat circuits are “ON”. If the breaker that powers the heat meter is off we are unable to read the meter and use the lower rate to calculate your bill.

If you have electric heat but do not have a heat meter, talk to Jarod Sutten at our business office at 605-886-5848 to see if you can qualify for the special electric heat rate.

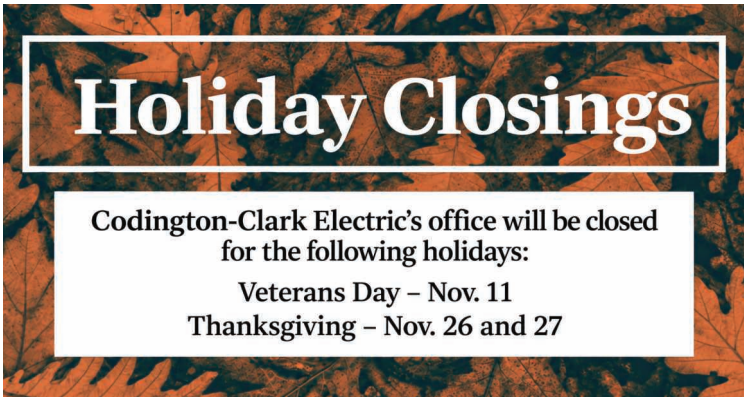

If you are planning to update your current heating system or install electric heat on your new service, you may want to talk to him about the energy savings comparison benefits of the electric heat rate and the rebates that are available.

Electric heat is clean, safe and reliable

While we are on the topic of heating, you should have a heating professional check your heat pump or furnace and lubricate all moving parts and check safety controls; check fans and belts and replace or clean the filter. Whether you have a heat pump or a forced air furnace, the cleanliness of the filter is important to your operating systems efficiency.

Checking your heating system now to see if it is ready for winter and before the snow starts to blow is better than having it go out in the middle of the winter.

NATE Builds Long-Term Office Space in Watertown With REED Loan

The National Association of Tower Erectors (NATE) is committed to keeping its headquarters in Watertown, South Dakota, and recently built a brand-new office building to support its expanding staff. Funding for the project was made possible through a $500,000 loan from the Rural Electric Economic Development (REED) Fund.

"The REED Fund was definitely helpful when it came to financing," says Michael Young, Secretary Treasurer and Executive Board Member for NATE. "This loan covered about half of the project, and we worked with the bank to fund the rest. We were able to double our office space because of REED funding."

The new office building reflects NATE's commitment to staying in South Dakota while also serving as a national trade association for communication infrastructure professionals.

The Association Had Grown Out of Its Rented Office Space

NATE, also known as the Communications Infrastructure Contractors Association, was founded in 1995 and has represented communications infrastructure companies and professionals for more than 30 years. During that time, it has expanded to more than 1,000 members in 49 out of 50 states – all except Hawaii, so far. As the association grew, so did its need for administrative support and other professionals to communicate with members and serve as a voice for the industry. NATE employees needed more space, so the organization looked toward long-term solutions.

The REED Fund allowed NATE to build a brand-new building with a reception area, meeting spaces, and 18 offices. It is much larger than the previous building, which had only eight offices.

"We had no problems applying for the REED loan," says Young. "We did our due diligence ahead of time to make sure we qualified and that it made sense for us. The REED funding made a difference in the cost of the project because of its interest rates, and allowed us to act in the best interests of our members."

Construction started last summer and wrapped up this year. The new building enables NATE to continue growing and to represent the communications infrastructure community.

Most Trade Associations Have Moved to Washington, D.C.

NATE is unique because it is committed to staying in Watertown, where it was founded and where a majority of its employees live. Even when the organization was looking to expand, it didn't want to go beyond Watertown and uproot its staff – and potentially their families.

"Most trade associations have moved to Washington, D.C. to be closer to the legislative action," says Young. "But we are committed to staying in Watertown. This building represents the roots we have put down here."

Dave Eide, left, General Manager, Codington-Clark Electric presents the REED loan check to Mike Young, Secretary Treasurer for NATE.

NATE has advocates in Washington, D.C., who meet with elected officials and speak to the importance of communications infrastructure, but the organization's core will always be in Watertown.

NATE is within the Codington-Clark Electric Cooperative service area, which is a REED member.

"Codington-Clark Electric is committed to local businesses and the promotion of economic development in our area using our revolving loan fund," says Dave Eide, General Manager of CCEC. "We're extremely proud to partner with NATE."

NATE Gives Communications Infrastructure a Unified Voice

Communication is more important than ever, with 98% of Americans owning a cell phone and 91% owning a smartphone. NATE works with legislative bodies to ensure the nation's telecommunications infrastructure needs are met while also protecting the people who work on these essential projects.

"If one person has a problem, they won't be heard, but when 1,000 professionals across 49 states speak up, they're more likely to be listened to," says Young. "We are a unified voice for the communications and tower industry."

NATE works with legislative teams to support and improve safety standards while setting expectations for training across the country. It's involved in major infrastructure projects, such as 5G buildouts, and stays on top of emerging, complementary technologies like satellite communications.

"You might think that satellite technology is a competitor to what we do, but we're actually working toward the same goal," says Young. "We both want to bring better communication to remote areas."

NATE will continue to support America's telecommunications infrastructure and the people who build, erect, and service the essential structures that make staying connected possible.

How a Youth Tour Friendship Changed Marty Larsen's Life

Frank Turner
frank.turner@sdrea.coop

When Marty Larsen earned a spot on the 1969 Youth Tour to Washington, D.C., through Turner-Hutchinson Electric Cooperative, he had every reason to believe dairy farming would remain at the center of his life. Turner-Hutchinson, a predecessor of today's Southeastern Electric Cooperative, served the area around his family's dairy farm seven miles west of Hurley.

Youth Tour gives high school students sponsored by their local electric cooperatives the chance to spend a week in Washington, D.C., visiting historic sites, learning about government and electric cooperatives and meeting students from across the country. South Dakota began sending students on the trip in 1963. Larsen went just six years later.

Back then, Turner-Hutchinson Electric selected its Youth Tour delegates through 4-H, rewarding young people for their accomplishments. In 1969,

Larsen placed eighth at the national 4-H dairy judging competition in Ohio. The accomplishment earned him the cooperative's Youth Tour trip to Washington, D.C.

But before Larsen could make the trip, an Army recruiter threw a wrench in his plans, warning him that he was likely to be called for service soon. Rather than wait to be drafted, Larsen chose to enlist, expecting to head to basic training and then Vietnam.

Not long after, Larsen received an induction notice, but first he had to complete a military physical. Larsen, who is hard of hearing, failed the hearing test and was disqualified from service. Had he passed, he said he would have left for basic training about a week before the 1969 Youth Tour departed.

"Somebody upstairs was looking out for me," he said.

With the Army no longer standing in the way, Larsen was going on the trip. To prepare, his mother bought him new clothes and a new pair of shoes. Even still, he returned home with the soles nearly worn through. At the Washington Monument, he and a small group of students climbed 897 steps rather than wait in the long elevator line, then rode the elevator back down.

Near the end of the trip, the group ate at a seafood restaurant along the Potomac River. Larsen persuaded the chaperones that the students ought to try lobster, something many of them had never eaten before. When the waitress brought lobster bibs to the table, Larsen passed his around and asked everyone to sign it.

His mother later saved the bib in the scrapbook she kept of his childhood, alongside years of 4-H ribbons, judging cards and other keepsakes. Larsen still has the scrapbook today.

The students took an evening cruise on a multilevel paddlewheel-style boat on the Potomac, complete with live music. South Dakota Youth Tour students continue the tradition of a river cruise today aboard the Cherry Blossom.

For Larsen, though, the most important part of Youth Tour was the people he met. One of them was John Nordlie of Sioux Falls, a young photographer who worked with the Argus Leader and later attended Augustana College.

The two became friends during the trip and stayed in contact after returning home.

"We stayed friends after we got back," he said. "I was in his wedding party when he got married. He was in my wedding party when I got married."

For the next several years, Larsen stayed close to the life he knew, working in dairy and welding. Nordlie, meanwhile, developed an interest in pipe organs. In 1983, he called Larsen and asked if he wanted to come work for him building organs for cathedrals and music halls.

Larsen agreed, bringing his experience as a welder, machinist and mechanical problem-solver into a trade he had never expected to enter. He spent the next 20 years working with Nordlie and became deeply involved in the mechanics of organ construction.

His work eventually went far beyond basic fabrication. Larsen built components, developed specialty tools and designed machinery for organ builders. One machine he created transformed a wire-bending process that had taken workers several minutes per piece, allowing them to produce several pieces per minute. Other tools he built ended up with organ companies elsewhere in the United States and overseas.

The work also took Larsen far beyond southeastern South Dakota. Over the years, he traveled throughout the country and to Japan, worked on historic instruments and helped construct and restore pipe organs in churches, museums and other settings. More than four decades after entering the trade, he is still involved in restoration work.

Looking back, Larsen can draw a direct line from the Youth Tour trip to the career that followed. Without the trip, he may never have met Nordlie. Without that friendship, the call inviting him into organ building may never have come.

"It meant a lot to me to be able to go on that trip," Larsen said. "It changed me from a dairy farmer to a pipe organ builder."

More than 50 years later, Larsen still has the scrapbook his mother kept from the trip, along with the signed lobster bib awnd other reminders of that week in Washington. But the most lasting thing he brought home was the friendship that, years later, opened the door to a life he never could have planned.

Thanksgiving Meals Bring Neighbors Together in Marshall and Murdo

Frank Turner
frank.turner@sdrea.coop

Across the Midwest, Thanksgiving has a way of becoming a community project. By late November, church kitchens, senior centers and fellowship halls fill with volunteers roasting turkeys with all the fixings for neighbors who need a meal or simply somewhere to spend the holiday. Nearly every town seems to have its own version. In Marshall, Minn., and Murdo, S.D., community Thanksgiving meals have lasted for decades.

Marshall, Minnesota

In Marshall, a community Thanksgiving dinner has grown from 35 meals served out of crockpots into an annual event that reached more than 900 people last year. Lyon-Lincoln Electric Cooperative member Teri Hively of Balaton, Minn., has been involved from the beginning and now leads the meal through Grace Life Church in Marshall.

The dinner started 35 years ago when Hively's late mother-in-law, inspired by God's vision, began to prepare a Thanksgiving meal for the community. Her idea came with a standard that still guides volunteers today: serve great food for a great community.

Kelly Deutz, left, and Teri Hively coordinate the Thanksgiving community meal in Marshall, Minn.

That standard means real turkey, real potatoes and a home-cooked meal served on glass plates with real silverware.

"I want it to be a home-cooked meal," Hively said. "I want it to feel like you're at home."

The Thanksgiving dinner requires months of planning and a network of volunteers. Hively and Kelly Deutz begin organizing in August, lining up cooks, servers, donations and the smaller jobs that need to be finished before Thanksgiving Day. Deutz helps organize all the volunteers and delivery routes.

The cooking begins days before anyone sits down to eat. Volunteers arrive at the start of the week to peel fresh potatoes while another group handles setup the day before Thanksgiving. When the big day arrives, even more volunteers fill the kitchen to set up serving lines, dessert tables and a proper dining area.

Some volunteers cook turkeys at home. Others donate pies or pans of bars, while local businesses and private donors provide ingredients and money. Hively estimates that more than 200 people contribute to the dinner each year.

"I could never do it alone," Deutz said. "It takes many hands to make that happen. I just happen to be the piece that helps drive it forward."

Luckily, feeding a crowd is familiar work for Hively, who spent more than 12 years working in catering.

Service is familiar to Hively, too. She has been an EMT for 37 years and a firefighter for 32 years, including volunteer service with the Balaton Fire Department, Balaton Ambulance and Tyler Ambulance.

In 2014, Hively's mother-in-law told her she was ready to step back and pass leadership of the dinner to Teri. Soon after, Hively's mother-in-law passed away unexpectedly, and Hively took over the following year in her memory.

"I took the lead role, not knowing I was going to be in charge without her," Hively said. "But I wasn't worried because I had been there every step along the way, so I knew what the meal entailed from beginning to end."

Today, the meal remains open to anyone, regardless of income or circumstance, and volunteers also deliver meals to older residents and those who are homebound. Some people need the food, Hively explained, while others simply need somewhere to spend Thanksgiving.

Hively's children grew up helping with the dinner, and now her grandchildren are taking part. She finds jobs for families with young children so they can help, too.

"Be the hands and feet of Jesus," said Hively.

Murdo, South Dakota

In Murdo, the Thanksgiving dinner began about 20 years ago with Joe Connot, who worked at West Central. When Connot retired, the Murdo Lions Club took over and continued serving the meal at the local senior center.

The club sponsors the dinner, and members cook the turkeys and help serve. The senior center provides the space and prepares the rest of the meal. Murdo Lions Club President Travis Van Dam said about 75 people usually attend, not including those who receive deliveries.

Van Dam joined the Lions Club after watching his father volunteer with the organization and wanting to do the same for Murdo.

"There's not a lot to do in our little town, so it's just something that we can do to provide for the community," said Van Dam.

The dinner is meant for people who do not want to cook, cannot cook or may not have family nearby. Volunteers also deliver meals around Murdo, including to employees at businesses that remain open on Thanksgiving.

Last year, Van Dam used Facebook to collect meal requests and organize deliveries.

"Just helping – it just feels good to help somebody and give them a meal," he said.

Freewill donations collected at the dinner help fund local service projects. Much of the club's fundraising supports Caring and Sharing, which helps people facing illness pay for travel, medical care, food and hotel stays.

Club members also help with community cleanup, sponsor a movie day for students, collect eyeglasses and volunteer at school sporting events.

"As long as we keep getting the turnout and people appreciate it, we'll keep doing it," he said.

In Marshall and Murdo, volunteers keep showing up to cook, serve and make sure their neighbors have a place around the Thanksgiving table.
